Safe 10 Smart PLUG IN

Protect your belongings.
Security combined with technology.

The Safe 10 Smart PLUG IN is compact and ideal for limited space. With a wired keyboard, backlit display and interior mat, the safe keeps your valuables safe with a double security system. It comes with a Data Kit to store and analyze the last 300 openings made by users.

The Safe 10 Smart PLUG IN is connected directly to the power grid (100–240V) via an external power adapter, **eliminating the need for 4 x 1.5V batteries** and minimizing maintenance: fewer interventions, less hazardous waste to dispose of, and real savings in terms of time, resources, and battery purchases. The non-volatile memory retains user passwords even in the event of a blackout, and thanks to a dedicated slot on the product, a standard 9V battery ensures quick and safe emergency opening.
