Safe Top Open Smart PLUG IN

Protect your belongings. Security combined with technology.

Safe Top Open Smart PLUG IN is the safe fitted with a top opening system for easy access to contents. Emergency opening can be performed with a mechanical key or electronic key (IB Card). This version is fitted with an electronic system that memorises the last 300 openings, accessible by PC and external Audit Trail (optional).

The Safe Top Open Smart PLUG IN is connected directly to the power grid (100–240V) via an external power adapter, eliminating the need for 4 x 1.5V batteries and minimizing maintenance: fewer interventions, less hazardous waste to dispose of, and real savings in terms of time, resources, and battery purchases. The non-volatile memory retains user passwords even in the event of a blackout, and thanks to a dedicated slot on the product, a standard 9V battery ensures quick and safe emergency opening
